WHY I RIDE *Shan Yee*

I HAVE RIDDEN the Flyer Shuttle since 2004; first on the Central route, then I switched to the Eastside in 2009. My favorite benefit of the Flyer Shuttle is being able to save money, at least \$200 per month, while making lots of friends. Monthly savings like that allows for the opportunity to save for nice gifts and vacations.

The Flyer Shuttle has benefits beyond my wallet too. If we want to breathe better air, and want our children and future generations to have cleaner air, we need to make

a difference now. Taking the Flyer Shuttle instead of my car is one way I can have an impact on air quality. Not only is it good for the environment, but taking the shuttle instead of my car enables me to relax and enjoy the ride, something I wouldn't be able to do otherwise.
